KocKlar

Process water disinfection P

Special product on the basis of active oxygen for the effective elimination of odours (odour-forming, anaerobic bacteria) in industrial water treatment and waste water treatment plants. Suitable for shock treatment and continuous feeding. KocKlar is not an additional load for the process water. It can even reduce the biological and chemical oxygen demand (COD/BOD). Not suitable for introduction into biological process water treatment plants.

Areas of use

Industrial water treatment and sewage treatment plants.

Recommendations for use

Add via dosing pump or manually pure during operation. Shock treatment: 150-300 ml per m^3 process water. Permanent dosage: daily 30-40 ml per m^3 industrial water or in car washes 10-15 ml per car.

Container

Container	Item no.
20 KG	75020

pH-value: 2

Warnings

Before using, check suitability and compatibility. Do not use in biological service water treatment plants. Use biocides safely. Always read the label and product information before use.
