Micro Cut M2.02

High-gloss anti-hologram polish silicone oil-free

Micro Cut M2.02 is a machine micro-polishing agent of the latest generation for the permanent removal of polishing haze, holograms, fine scratches and sanding from 4,000 grit on all (including scratch-resistant) paint systems. A brilliant and lasting high-gloss finish is created even on dark and similarly sensitive colours under extreme lighting conditions by using highly specialized, extremely homogeneous abrasives. Holograms and fine scratches are eliminated mechanically. Micro Cut M2.02 is extremely economical, easy to polish and can be removed without leaving any residue.

Grinding level: 2.5 Gloss level: 9.0

Areas of use

Paints on cars, commercial vehicles, motorcycles, etc.

Recommendations for use

To achieve optimal results, we recommend processing with our Micro Cut Pad and a highperformance eccentric (min. 15 mm stroke) or with an eccentric with forced rotation. Distribute evenly over the surface of the pad for optimal dosing. Distribute the polish evenly over the surface with the machine at the lowest speed and then polish crosswise with medium pressure until a transparent film is formed, i.e. until the aluminium oxide contained has completely disintegrated. Do not alternate the sponges used for this product with other products. For the scratch-free removal of polish residues, we recommend our ultrasonically cut Polish & Sealing Towel.

Container

Container	Item no.
1 L	468001
0,25 L	468250

Warnings

Shake before use. Check for suitability and compatibility before use. Do not apply to hot surfaces. Protect from frost and excessive heat. Do not use on painted plastics and rubber.
